

International Direct Dialling (IDD) Plan

The following dialling procedure is applicable for IDD calls made using call-by-call selection method:

Carrier Prefix (0XY) + Country Code in the called country + **National (significant) Number** in the called country

(The carrier prefix (0XY) shall be used by subscribers to select an ILD carrier on a call-by-call basis, where 'X' stands for digits between 2 and 9 inclusive, and 'Y' stands for digits between 0 and 9 inclusive)

The following dialling procedure is applicable for IDD calls made using carrier pre-selection method:

International Access Number (00) + Country Code in the called country + **National (significant) Number** in the called country

(The '00' access number shall be used by subscribers only after they have preselected a carrier of their choice)
