**Notes:**

- The tariffs provided for the relevant service categories are exclusive of VAT and refer to the approved tariffs, applicable at the end of the calendar year, as commercialised by the **licensed operator with the largest subscriber base / traffic for that year**. Consequently, the tariffs provided do not necessarily belong to the same licensed operator in every calendar year under the period identified.
- The tariff for 'Entry Level Offer' in relation to fixed internet services refers to the **cheapest** approved tariff, with due consideration to Note 1 above. Where volume cap are applicable, these are specified under the respective monthly tariffs, beyond which the user can continue to browse on an 'unlimited' basis but typically at a lower speed as per the corresponding operator's policy.
- The tariff for 'Standard Offer' in relation to fixed internet services refers to the approved tariff for the **most popular** fixed access internet plan, with due consideration to Note 1 above. Where volume cap are applicable, these are specified under the respective monthly tariffs, beyond which the user can continue to browse on an 'unlimited' basis but typically at a lower speed as per the corresponding operator's policy.
- The tariffs provided for the mobile internet service refer to selected plans of varying duration, which may include SMS allowances but do not include plans with voice allowances, with due consideration to Note 1 above. Where volume cap are applicable, these are specified under the respective tariffs. For unlimited mobile internet plans, the user can continue to browse on an 'unlimited' basis but typically at a lower speed as per the corresponding operator's policy.
